

UDS COURSE PRACTICAL ONE DAY 2011

Visit our Educational Course Section on our website, www.laborie.com for complete course agenda and online registration.

OTHER EDUCATION COURSES ALSO AVAILABLE:

2 Day Urodynamics Training Course

Urodynamic Test Results - Interpreting and Integrating Them Into Your Practice

Demystifying Pelvic Floor Rehabilitation: A Comprehensive 2 Day Course

"Hands-On" Pediatric Pelvic Floor Rehabilitation and Conservative Treatment Training Course

LABORIE
HANDS-ON URODYNAMICS TRAINING COURSE 2011

Target Audience:

"Hands-On Urodynamics - A Practical Approach" is designed for professionals who have little or no experience with actual urodynamic testing procedures, and for those with some experience who wish to become more comfortable with performing urodynamic testing.

Course Accreditation:

Please note there are no CME credits awarded for this course.

Tax Deduction:

The expense of continuing education when taken to maintain and improve professional skills is usually considered a tax-deductible expense. Please contact your accountant for complete details regarding your specific eligibility.

Hotel Information:

Contact the Course Coordinator for details on hotel discounts. LABORIE works to provide the most favorable room rates available at each location. A limited number of guest rooms have been blocked at host hotels in each city.

For further information, contact your local representative or call Kelly Maginnis, at 1.800.LABORIE (522.6743) or 1.802.857.1300.

Register on-line: www.laborie.com

Course Description:

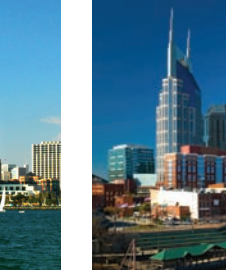

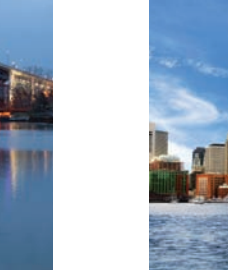

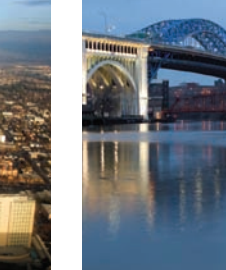

LABORIE's one-day course offers a relaxed, comfortable environment away from the distractions of the busy clinic to concentrate on learning how to perform accurate urodynamic testing with minimal stress for you or your patient. International Continence Society standards are for urodynamic studies. The teachings in these courses follow ICS guidelines for technique, annotation, and documentation.

Note: Maximum attendance of 16 participants per course.

Course Objectives:

Participants will acquire the knowledge and skills to:

- Comprehend the need for urodynamic testing
- Understand the components of urodynamic tests
- Prepare the patient and the software
 - Patient positioning
 - Catheter placement
 - Taping techniques
 - Troubleshooting with the most common catheters - fluid, air-charged, and electronic
- Run tests
- Recognize artifact
- Perform basic troubleshooting techniques
