

Objective:

To provide an educational opportunity to the new urodynamic examiner who seeks assistance in interpreting urodynamic testing results and applying this to their practice. All ICS guidelines for urodynamic testing will be observed.

The training course will include the following topics and methods:

1. Basic anatomy and physiology of the urinary system - LUTS
2. What to investigate: failure to store, failure to empty
3. Components of the urodynamic investigation
 - a. Pre-urodynamic testing needs (Voiding Diary; Lab Tests; Physical Exam)
 - b. When to prescribe urodynamics
 - c. Which tests are appropriate
 - d. How to integrate UDS with complete urinary system evaluation
 - e. Including - Uroflow, CMG, EMG, Leak point pressure testing, Pressure/Flow study, Urethral Pressure Profiles
4. Review of previously conducted urodynamic studies
 - a. Examples of wide range of scenarios
 - i. Detrusor overactivity (Neurogenic; OAB with incontinence; idiopathic); Stress urinary incontinence; Compliance; Obstructive voiding patterns (Male, female, dysfunctional voiding, Detrusor/sphincter dyssynergia)
 - ii. Detrusor underactivity
 - b. Relating the graphical display and the report summaries to the accurate diagnosis

5. How to integrate urodynamic testing into physicians' practice
 - a. How this fits into the evaluation of patients
 - b. How UDS results can guide treatment plans
 - c. How to correctly bill for procedures

Cost:

\$550.00 USD

Course Accreditation:

Please note there are no CME credits awarded for this course.

Tax Deduction:

The expense of continuing education when taken to maintain and improve professional skills is usually considered a tax-deductible expense. Please contact your accountant for complete details regarding your specific eligibility.

Hotel Information:

Contact the Course Coordinator for details on hotel discounts. Laborie works to provide the most favorable room rates available at each location. A limited number of guest rooms have been blocked at host hotels in each city.
