

# EDUCATION

## COURSE OFFERINGS

LABORIE prides itself on its diverse pelvic floor educational offerings. Types of courses include urodynamics, pelvic floor rehabilitation for adults and children, fecal incontinence diagnostics and online webinar series with a focus on interpreting urodynamic studies. Education specific to urodynamics encompasses hands-on learning, interpreting results and comprehensive urodynamics. Our courses benefit beginner, intermediate and advanced level clinicians who treat and diagnose pelvic floor disorders.

## CLASSIFICATION OF COURSES

- 1 Day Courses: Practical  
Interpretation  
Fecal Incontinence Diagnostics
- 2 Day Courses: Adult Pelvic Floor Rehabilitation  
Pediatric Pelvic Floor Rehabilitation
- 2.5 Day Course: Comprehensive Urodynamics
- Online Courses: Webinars

*Innovation for Pelvic Health*

# EDUCATIONAL OUTLINE

COURSE	AUDIENCE	OBJECTIVES	CME CREDITS
Hands-On Urodynamics	Clinicians with little or no experience (0 to 6 months minimum)	<ul style="list-style-type: none"> <li>• Comprehend need for urodynamic testing</li> <li>• Prepare the patient and software</li> <li>• Run tests and recognize artifact</li> <li>• Basic troubleshooting techniques</li> </ul>	None
Urodynamic Test Results	Clinicians who seek assistance in interpreting test results	<ul style="list-style-type: none"> <li>• Anatomy and physiology of urinary system</li> <li>• Failure to store, failure to empty</li> <li>• Components of urodynamic investigation</li> <li>• Review of conducted urodynamic studies</li> </ul>	None
2.5 Day Comprehensive Urodynamics	Clinicians with some experience (6 months to 1 year minimum)	<ul style="list-style-type: none"> <li>• Instruction on technique</li> <li>• Recognition and correction of artifacts</li> <li>• Hands-on experience and Interpretation of results</li> <li>• Observation of live patient studies</li> </ul>	11.7 contact hours for nurses and nurse types
Adult Pelvic Floor Rehabilitation	Clinicians who wish to learn the science of performing pelvic floor rehabilitation	<ul style="list-style-type: none"> <li>• Identify testing required in evaluation of pelvic floor dysfunction</li> <li>• Non-surgical options for treatment of urinary, fecal incontinence, pelvic pain and voiding dysfunction</li> <li>• Basic coding and reimbursement</li> <li>• Hands-on experience with Urostym</li> </ul>	13.5 contact hours for nurses and nurse types
Pediatric Pelvic Floor Rehabilitation	Clinicians who wish to learn the science of performing pelvic floor rehabilitation	<ul style="list-style-type: none"> <li>• Understand physiology of lower urinary tract in children</li> <li>• Develop strategies for managing pelvic floor dysfunction in children</li> <li>• Apply principles of pelvic floor therapy in children</li> <li>• Hands-on experience with Urostym</li> </ul>	13.5 contact hours for nurses and nurse types
Fecal Incontinence Diagnostics	Clinicians who wish to learn about fecal incontinence diagnostics	<ul style="list-style-type: none"> <li>• Proficiency of basic fundamentals</li> <li>• Anorectal manometry/transrectal ultrasound</li> <li>• Review of case studies</li> </ul>	None
Webinars	Clinicians who seek assistance with interpreting test results	<ul style="list-style-type: none"> <li>• Interpretation of Urodynamic Studies</li> </ul>	None
