Urodynamics
3-day Laborie / MMS Training Course
Course director Drs. Dick Janssen

Laborie / MMS is proud to offer a practice-based course on Urodynamics and the use of urodynamic systems.

The training course includes one day of hands-on practice with urodynamic systems, one day of lectures and discussion with Drs. Dick Janssen, and one day observation of patient examinations in the Radboud University Medical Center.

Date
August 31 - September 2, 2016

Location
Laborie / MMS Training Center in Enschede, The Netherlands.
Radboud University Medical Center in Nijmegen, The Netherlands.

Goal
To gain more knowledge of Urodynamic investigations and curve interpretation in order to improve the performance of examinations in daily practice.
To become more acquainted with the measurement systems.

Target audience
Physicians, nurses and other health care professionals with basic knowledge of Urodynamics.

Course highlights
- Common indications for performing urodynamics
- Basic principles and medical indications
- Application of urodynamics in clinical practice
- Good urodynamic practice (GUP) and pitfalls
- Typical urodynamic protocols
- Hands-on practice in using the measurement systems and catheters
- Hands-on practice in editing and report generation
- Analysis and curve interpretation of urodynamic patient cases
- Live demonstrations of examinations

Registration and further information
