

RenovaRP® Buyers Guide

Finding the perfect paracentesis solution isn't always easy. There are several performance features to consider, storage limitations, and budgets to keep in mind. To help you find the paracentesis solution that is right for you, consider the following criteria, and indicate which features are important to you by checking Yes or No in the columns to the right:

Do you want a paracentesis solution that...	Yes	No
Provides gentle, automated fluid removal?		
Offers adjustable speed for full procedural control?		
Increases speed without increasing pressure?		
Is a closed system that reduces exposure risk for staff and patient?		
Does not require starting and stopping to change drainage containers?		
Is portable and not limited to a single room or department?		
Is easy to store, taking up minimal space?		
Does not require breakable glass bottles or leaky containers?		

If these features are critical to your paracentesis management solution, then **RenovaRP is right for you.** Offering portability and speed control, Renova keeps patient comfort and satisfaction top of mind at all times.
