

traxi[®] & ABBy[™]
Panniculus Retraction System

OBSTETRICS, GYNECOLOGY & NEONATAL
Predictable and reliable C-section
solutions for dignified care.

Reliable Retraction from the OR to Postpartum to Home.

Intraoperative

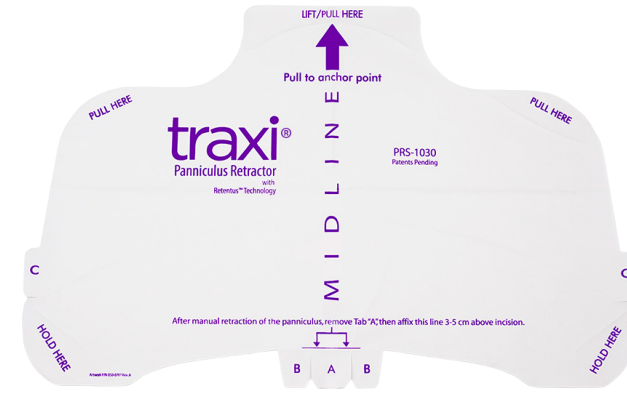

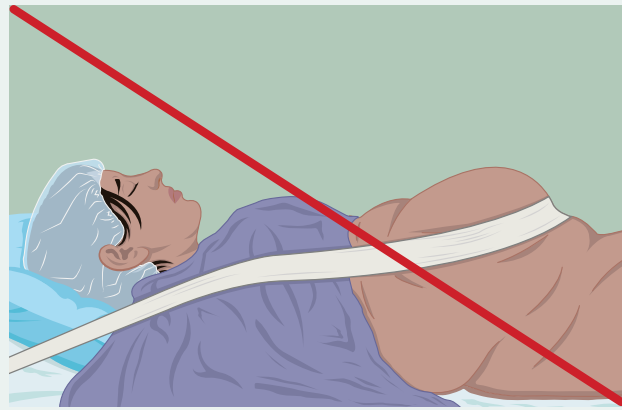

Postoperative

Care Pathway

traxi® intraoperative panniculus retractor

Outdated practices for high BMI C-section:

- Taping patient to bed or equipment
- Manual retraction by staff
- Towel clamps and other undignified retraction solutions

Predictable. Reliable. Retraction.™

Retracting the panniculus provides improved access and visualization of the incision site.

- Have confidence in a repeatable process
- Leave traxi in place for up to 24 hours post-op or replace with ABBY immediately
- Care for patients with more compassion and dignity
- Increase retraction for BMI's > 50 by adding the traxi Extender

Patient Benefits

- Freedom of movement
- Breastfeed whilst wearing traxi
- Ability to wear postoperatively

Potential Patient Benefits

- Increased satisfaction
- Increased comfort
- Increased dignity
- Skin to skin

Clinician Benefits

- Improved incision site visualization
- Eliminate surgical tape & towel clamps
- Eliminate manual holding

Potential Clinician Benefits

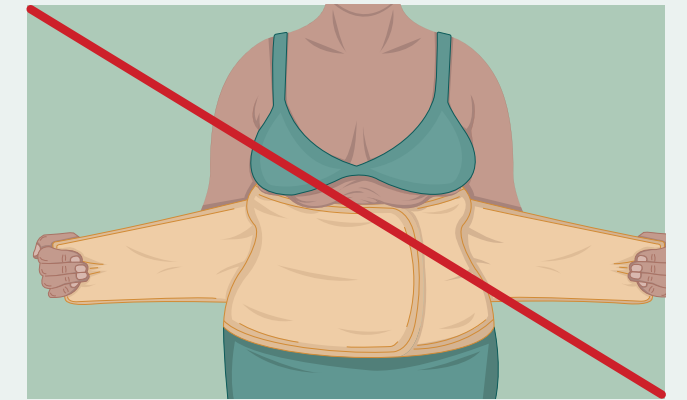

- Decreased time in surgery
- Decreased risk of staff injury
- Easily assess incision site postoperatively
- Fewer staff involved

ABBy™ postoperative panniculus retractor

Current practices for post C-section:

- Abdominal Binder
- Negative wound pressure therapy only
- Wound dressing only

Postoperative retraction for all your C-section patients.

ABBy holds the pannus off the incision site and reduces the interference in the wound healing process.

- Suitable for all BMIs, body shapes and types
- Can be applied by a single clinician and adjusted by the patient at home
- Leave ABBY in place for up to 14 days post-op

Patient Benefits

- Freedom of movement
- Supports breastfeeding and skin-to-skin
- Leave in place up to 14 days
- Gentle to the skin
- Hypoallergenic and latex free
- Shower compatible
- Most patients would wear ABBY again or recommend to a friend having a C-section

Potential Patient Benefits

- Increased comfort and mobility
- Improved experience of 4th trimester

Clinician Benefits

- Improved incision site visualization
- Suitable for all BMIs, body shapes and types
- Conforms to patients' anatomy
- Oxygenation at the wound site
- Provides access to incision site
- Supports dignifying postoperative care

Potential Clinician Benefits

- Mitigate risk of infection
- Easier management of the incision

Zuckerwise LC, Mulhall JC, Thompson JL, Jackson LA, McNeill-Simaan EO, Osmundson SS. Effect of panniculus elevation device on postoperative pain after cesarean delivery: a randomized controlled trial. Am J Obstet Gynecol MFM. 2023 May;5(5):100920. doi: 10.1016/j.ajogmf.2023.100920. Epub 2023 Mar 6. PMID: 36889439.

Clinicians' thoughts about the panniculus retraction system

"The traxi gently elevates tissue for incisions while preserving patient dignity. In my opinion, the post-op retractor, ABBy, promotes comfort by lifting tissue from the healing wound, offering compression, and creating an ideal healing environment. Using both together in my practice has been a game changer."

- Tori O'Daniel, MD

"The traxi Panniculus Retractor is as perfect as solution to the pannus problem as I have ever tried. This product is a winner... big-time winner."

- James Greenberg, MD

"With the addition of ABBy, I have seen an overall improvement in patient comfort after C-sections. Patients report it as simple to use and they feel comfortable using it for weeks after leaving the hospital, making postoperative care of their incision easier."

- Karie H. Lafleur, MD

"I have been using the ABBy panniculus retractor for several years on all of our C-section patients. I started to use the product only on our larger patients having a C-section to potentially decrease the opportunity for incisional infection. I quickly learned that the real magic of the product is the increase in comfort and mobility for our patients. We now use the ABBy on all C-section as soon as the dressing is removed. Thanks for making a product that truly improves the care of our new mothers enabling them to enjoy their new baby."

- Tammy Jerz, Birthplace Manager
