

LABORIE PRODUCTS HELP GUIDE THE PATHWAY TO BETTER UROLOGICAL HEALTH

LABORIE helps providers along the care pathway with a comprehensive suite of products and services and offers options for the diagnosis, treatment, and ongoing support of their patients.

The NXT™ Go is part of the Laborie Intelligent Cath-ID System

Supporting Patient Safety and Enhancing Urodynamics Quality

- Supports best practices in single patient use of consumables to minimize risk of cross-infection and/or cross-transmission
- Catheter compatibility for quality urodynamic studies
- Supports traceability, removes need for manual entry, reducing errors while automating workflow

WE ARE HERE TO SUPPORT YOU

Visit us at: <https://www.laborie.com/product/NXT-range>

Talk to your Laborie Territory Manager about how NXT™ can help your practice.

Some Laborie products may not be available in certain regions. Please contact your local Laborie Sales Representative to learn more about the products available to you.

NXT™ Go

Defining the New Standard in Urodynamics

UROLOGY & UROGYNECOLOGY

NXT™ is the new standard for modern Urodynamics to improve physician confidence and patient experience.

NXT™ Systems

The New Standard in Urodynamics

NXT™ Go System

NXT™ Go is a complete Urodynamics system offering the convenience and portability in a suitcase.

Compact Carry Case:
Complete portable UDS system

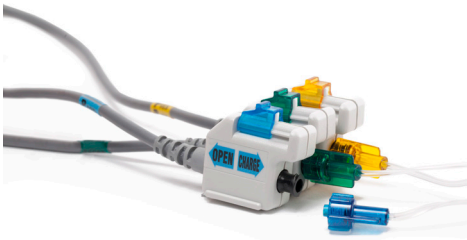

Infusion Pump:
Includes infusion transducer for infusion accuracy

Consumable Scanning:
For documentation and traceability

Water-resistant Components:
For easy cleaning and wipedown in-between studies

Smart-sense:
Integrated consumables support traceability for infection control

Catheters:
Intuitive catheter design for easy setup and procedure start

The **Remote Control** helps mark key events from across the room.

The **NXT Urocap** comes wired or wireless and designed for seamless integration within the NXT platform.

The **NXT Pump module** features state of the art technology, a wide range of flow rates and multiple calibration line storage.

The NXT Go offers a **laptop with Synergy Urodynamics software**,

providing a wide range of features in a compact system.

A **wireless capable printer** included for convenient document creation and immediate review with patients.

The **NXT Roam and PIM** is a sophisticated module that delivers pressure and EMG readings in a user-friendly format.

The **UPP Puller** boasts Laborie's smallest footprint and completely wireless battery operation. Available on a stand-alone rolling floor stand.

Synergy Software

URODYNAMICS, YOUR WAY.

Customizable Workflows and Reports:

Configurable workflow and reporting tools address the unique needs of academic facilities, hospitals and clinics.

Enhanced User Experience:

Intuitive design, workflow guidance and seamless interface puts NXT™ at the forefront of modern urodynamics.

Next Generation Decision Support and Error Prevention:

Guided workflow helps in training with new staff and ensuring test consistency.
