pH Capsule Monitoring System

GASTROENTEROLOGY  
Wireless pH Capsule Reflux  
Monitoring System

alpHaONE

# Establish a clear path in GERD diagnosis

With an increasing number of options for GERD diagnosis, patients and healthcare providers face a challenge in choosing the best solution for a clear diagnosis. alHaONE is a calibration-free wireless reflux testing system that offers monitoring for up to 96 hours giving healthcare providers the information they need to make accurate diagnoses and effective treatment plans.

## RECORDER

-  Ergonomic and compact design
-  Patient-friendly design with enlarged, easy-to-press buttons
-  Battery operated allowing for immediate patient use

## CAPSULE

-  Calibration-free and up to 96 hours comprehensive recording
-  Easy handling and fail-safe mechanism for capsule attachment (or delivery)
-  Smooth conveyer tip to avoid injury during placement

# All-in-one software platform

The new software platform is your one-stop destination for reflux studies. You can prepare, download and review cases from pH-capsules as well as cases from pH and pH-impedance catheters.

- Virtual Instruction Program (VIP) for intuitive navigation
- User-definable buttons
- Comprehensive user-definable reports
- Multiple investigation protocols

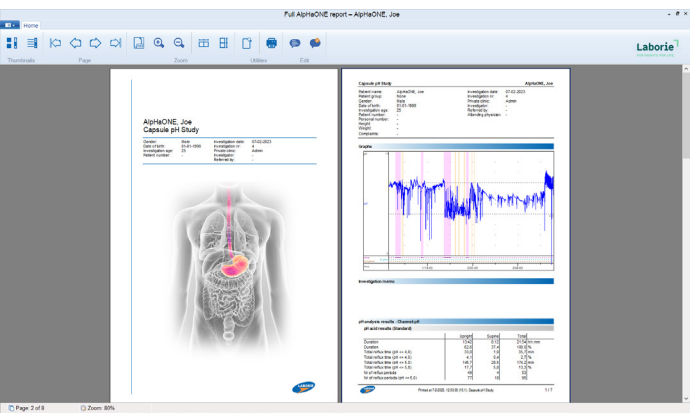

## EDITING

- Automatic analysis of the pH data
- Comprehensive tools for zooming and navigation of the study
- Quick results for detailed pH and symptom score

## REPORT

- Customize and export reports
- Perform various calculations including SI, SSI and SAP
- Generates pH data analysis table, process DeMeester rating automatically
