

ABByTM

Postoperative panniculus retraction

OBSTETRICS, GYNAECOLOGY & NEONATAL

A dignifying solution for all your C-section patients for up to 14 days post-surgery.

At Laborie, we believe that great healthcare is an essential safeguard of human dignity.

▲ ABBY Panniculus Retractor

Postoperative retraction for all your C-Section patients

ABBY holds the pannus off the incision site and reduces the interference in the wound healing process.

- Suitable for all BMIs, body shapes and types
- Can be applied by a single clinician and adjusted by the patient at home
- Leave ABBY in place for up to 14-days post-op

Patient Benefits

- Preserves the patient's dignity during the 4th trimester
- Enables skin-to-skin contact
- Does not interfere with breast feeding
- Can be adjusted and/or reapplied
- Can be worn while showering
- Gentle to the skin and hypoallergenic

Clinician Benefits

- Improved access and visualisation of the incision site
- Resistant to bacterial growth
- Enables light exposure and oxygenation at the wound site
- Works alongside wound dressings
- Available in 3 sizes to fit patient's individual anatomy
